Oil, Gas and Mining Division
4241 State Office Building
Salt Lake City, Utah

ATTENTION: Mr. Jim Shirazi, Director

We presently have a land lease with Kennecott Minerals Company for the right to remove materials from the following described property:

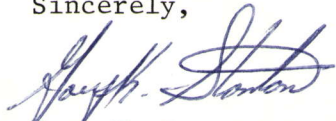

5½ NE¼, SE¼ Section 19, SW¼ NW¼, SW¼ Section 20, NW¼ Section 29, NE¼ NE¼ Section 30, all within Township 1 South, Range 3 West, Salt Lake Base and Meridian, containing 366.0 Acres more or less

This lease has provisions for reclamation, which we, of course, will follow. We have obtained all clearances from Mr. Bill Southard of Kennecott to begin removing materials. However, he suggested I contact you to see if any possible permits are required.

The railroad contacted us to furnish materials from the above source, on what is termed an emergency basis. The railroad intends to use these materials to reinforce the causeway on the Great Salt Lake. This work will, hopefully, provide continued rail service to the Valley as well as maintaining the safety standards of the railroad.

If we are required to obtain any special permits for this source, we request your immediate and timely approval, so our operations can begin by the first of next week without delays. If you need further information, please, contact me at 266-8879.

Sincerely,

Gary K. Stanton,
General Superintendent

will be left which exceeds 30 degrees or the natural angle of repose of the material involved, whichever is less.

16. Lessee shall not allow any buildup of concrete upon the leased premises as a result of washing of ready mix trucks or from the general cleanup of its operations. If any prolonged concrete buildup occurs, Lessee shall remove said concrete deposits from the lease premises immediately upon request of Lessor.

17. Lessee shall recontour, recover, rehabilitate and replant all mined-over areas as close as possible to the working areas. At no time shall the reconditioning process lag behind the work area for a distance over 500 feet. The top 10-inch surface of soil of the area excavated shall be removed and stockpiled for use in the reconditioning process. In the event this Lease is terminated prior to the completion of all available excavation work, Lessee shall, within three (3) months of termination, grade the surface disturbed by operations under this Lease and replace stockpiled material in accordance with Lessor's instructions. The earth levees shown upon the attached Exhibit "A" will be maintained at their present location to prevent flooding.

18. The Lease may be terminated as follows:

(a) It is expressly stipulated and agreed that upon the failure of Lessee to strictly comply with all of the terms of this Lease, then Lessor may at its option elect to terminate this Lease and, upon the notice of termination thereof, reenter and take possession of said premises and the whole thereof, either with or without process of law.

MINED LAND RECLAMATION ANNUAL REPORT
OCTOBER 1, 1981 TO OCTOBER 1, 1982

KENNECOTT - UTAH COPPER DIVISION

Introduction

The following report is submitted to the Utah State Division of Oil, Gas and Mining as prescribed under paragraph (b), Rule M-8, Utah State Mined Land Reclamation Act of 1975. The report summarizes work performed during the period October 1, 1981 to October 1, 1982 as approved on the Notice of Intention to Commence Mining Operations #Act-035-002, August 9, 1976 and subsequent surety agreement.

Location of Operations

Under the original notice the operations of the Bingham mine and concentrator were conducted in the following sections of Salt Lake and Tooele Counties:

Sec 7, 8, 9, 10, 11, 17, 18, 19, 20, 21, 30, 31 & 32, T1S, R2W, SLB&M; Sec 9, 10, 11, 12, 13, 14, 15, 16, 22, 23, 24, 25, 26 & 36, T1S, R3W, SLB&M; Sec 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 22, 23, 27, 28 & 33, T2S, R2W, SLB&M; Sec 7, 8, 17, 18 & 19, T3S, R1W, SLB&M; Sec 8, 13, 14, 15, 16, 17, 18, 19, 20, 21, 24, 25, 28, 29, 30, 31 & 32, T3S, R2W, SLB&M; Sec 11, 12, 13, 14, 15, 21, 22, 23, 24, 25, 26, 27, 33, 34, 35 & 36, T3S, R3W, SLB&M; Sec 6 & 7, T4S, R2W, SLB&M; Sec 1, 2, 3, 11 & 12, T4S, R3W, SLB&M.

Summary of Mining and Concentrating Operations

Disturbance of the natural terrain in the mine area during the period was confined to the following sections in Salt Lake County:

Sec 18, 19, 20, 29, 31 & 32, T3S, R2W, SLB&M; Sec 13, T3S, R3W, SLB&M; Sec 1, T4S, R3W, SLB&M.

During the reporting period, mining and concentrating operations mined and milled an estimated 38,344,000 short tons of ore. An estimated 123,726,343 short tons of waste material were removed from the mine and deposited on waste dumps or used for construction material. Waste material from the concentrating operations was deposited on the division's existing tailing pond. This resulted in a rise in elevation of the tailing pond of approximately four feet.

During the reporting period, a new concentrator water treatment facility was built in Sec 15 & 16, T1S, R3W, SLB&M. This water treatment facility, with pipelines, disturbed approximately 15 acres of land. All dikes and berms have been seeded with grasses, and tree rows have been planted on the dike. Pipelines on previously undisturbed areas will be dressed down and seeded.
